

# Truthset Scored Segments

## When accuracy really matters

Accurate data has been proven to increase marketing conversions. LBDigital is approaching just that with our Truthset Scored Segments. We now have 54 household demographic audiences available for highly accurate marketing campaigns.

## Take the "IN" out of "INACCURATE"

Truthset Scored segments are filtered to allow you to reach only the verified audiences that meet an accuracy threshold, determined by Truthscores™. Only highly accurate IDs are included in the Truthset Scored Segments which are then pushed to all major buying platforms.

With LBDigital's Truthset Scored Segments, marketers are able to more precisely target their desired customers, eliminate wasted spend against inaccurate segment IDs and increase ROI with the ease of a few keystrokes.

## How it works

With our Truthset Scored segments, we take an audience, such as pet owners, that may have 90% accuracy. Then we slice off the bottom decile, so that the new "Truthset Scored" segment is approaching 100% in total accuracy. In this way, we provide more accurate targeting, less wasted media spend, and better ROI.

## Household Demographics approaching 100% accuracy

- Age
- Gender
- Education Level
- Ethnicity
- Home Ownership
- Household Income
- Language Spoken
- Marital Status
- Pet Ownership
